The exhibition will provide vital access for companies trying to penetrate the Thai and Indochina markets of Vietnam, Cambodia and Laos. The combined population of these countries which is in excess of 160 million people, and the changing demographics in terms of declines in fertility, longer life expectancy and the aging population will have an enormous impact on the need for better healthcare. With the increase in medical tourism, particularly in Thailand, many of the healthcare institutions are in need of new equipment, solutions and better initiatives to serve the medical and healthcare needs.
